

Security: How to enable Pairing with the CBT100AP

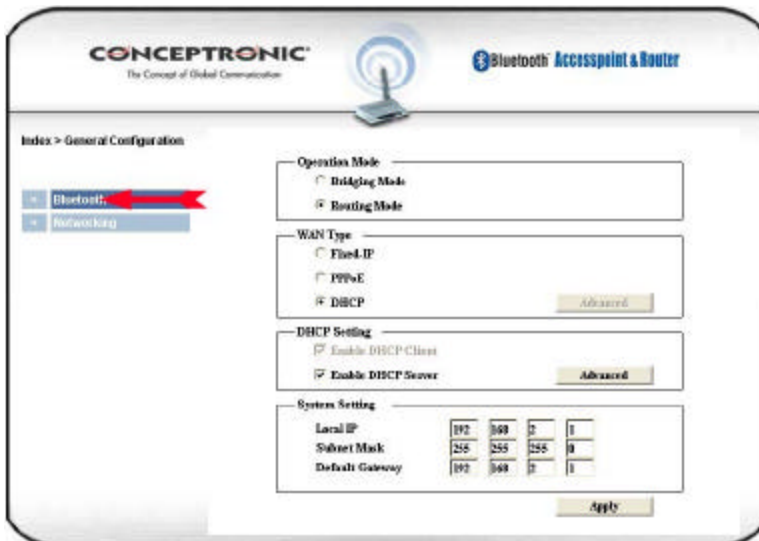

Open a web browser and type <http://192.168.2.1> in the address bar.

Click **Login**
(by default the Login is **root**
and no Password is used)

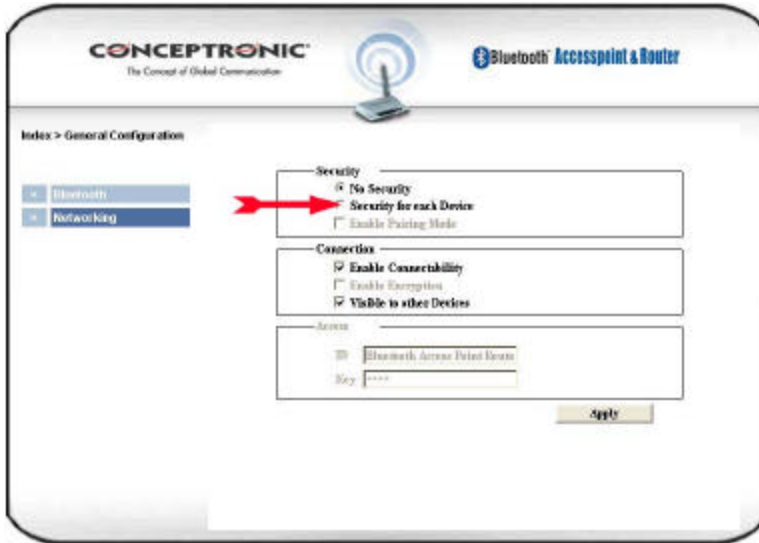

Click **General Configuration**

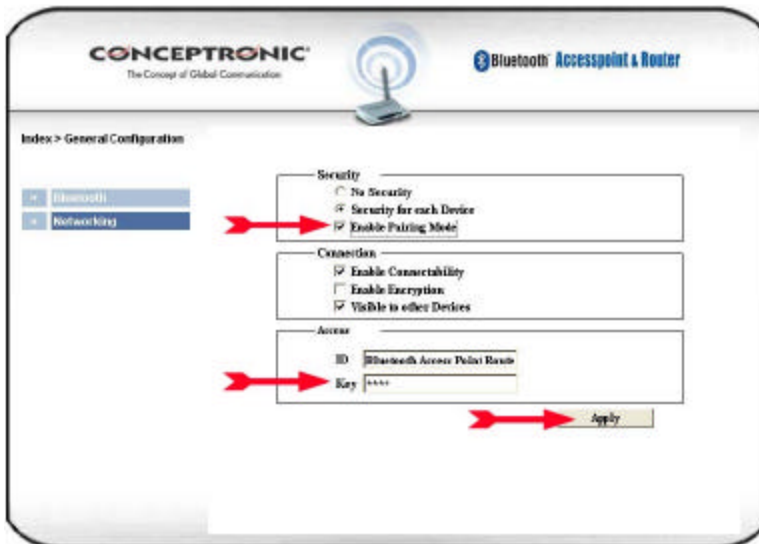

Click **Bluetooth**

Security: How to enable Pairing with the CBT100AP

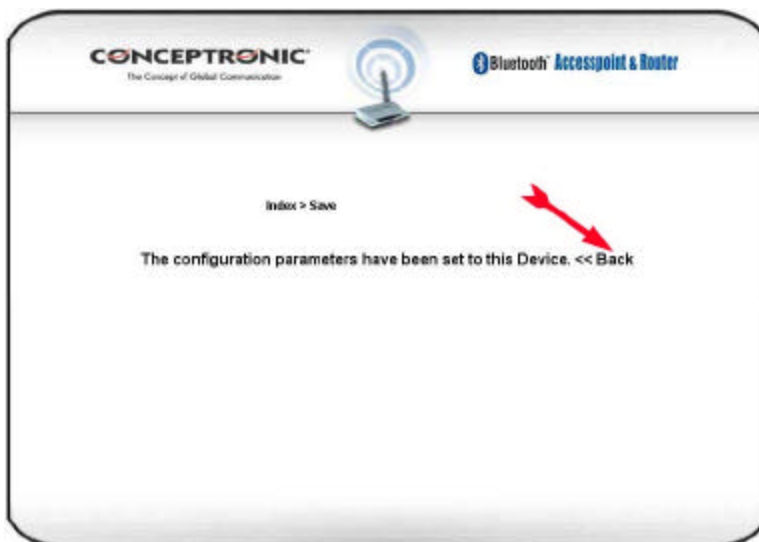

Select **Security** for each Device

Select **Enable Pairing Mode**

Standard the key is set to **1234**
Change it if required

And click **Apply**

The Pairing key is now set.
This will be in effect the next time
you connect to the Access Point.

Click **Back** to go back
or close your browser.
