

Firmware update instructions for the Conceptronic CHD3NET

1. Login on to the CHD3NET. The default settings are :

IP-Address	: http://169.254.0.1
Hostname	: http://storage
User name	: admin
Password	: admin

2. Click on the option '**Maintenance**'.
3. Click on the '**Browse**' button to select the firmware file. Once the file has been selected click on '**Open**'. The .bin file that you have selected will appear in the field next to the '**Browse**' button.
4. Now press the '**Upload**' button. You will then get a confirmation window.
Click on the '**OK**' button to start the upgrade process.

Do not turn the CHD3NET off during the firmware upgrade and also do not close the internet browser.

5. After the firmware upgrade has succeeded you will get another confirmation window. Click on the '**OK**' button.
6. The CHD3NET needs to be restarted after the firmware upgrade. Click on the '**Reboot**' button which will trigger another confirmation window. Click the '**OK**' button to restart the CHD3NET and wait till the progress bar gets to 100%.
7. The CHD3NET is now fully updated and ready to be used.

Conceptronic CHD3NET Release Notes Firmware version 014

014 **10-11-2009**

Added: Windows 7 compatible.

012 **02-05-2008**

Fix: Linux command "mount.cifs" works.

011 **19-02-2008**

Fix: The problem of modification date being changed when files are copied on Mac OS.

010 **25-12-2007**

Modification: Increased possible mounted remote drives from 2 to 8 on Mac OS 10.4.x.

Modification: Support longer file names instead of DOS 8.3 shorter file names.

009

Initial release.
