

Mobile View

With the development of Mobile phone operation system and WIFI coverage, Mobile phone view Network Camera becomes the truth. This instruction is overviews of Mobile phone view our B/H series product.

1 Mobile Phone Browser View

Presently, most the smart phone have browser and can also install third party mobile phone browser, like opera mobile browser (download address: <http://www.opera.com>).

User can directly input our manufactory DDNS in mobile phone browser to visit, if can't visit, user can try the url like <http://ip:port/mobile.html> or http://third_party_ddns:port/mobile.html .

2 Software View

We develop specialized software for mobile phone view (their browsers can't visit the ip camera), it can support B/H series product. User can use manufacturer DDNS, third party DDNS or IP address to view.
